HAMILTON AT LLOYD'S

An introduction

Hamilton has been at home at Lloyd's since 2015 when we acquired Syndicate 3334. Today, we stand among dozens of managing agents and other syndicates, each with its own discrete specialties and areas of expertise, to write the risks that we view as presenting the best value for our clients and shareholders. We're delighted to interact with these companies and draw on the flexible Lloyd's underwriting model to create insurance solutions for businesses worldwide. We're proud to bring our unique approach to writing risk to the Lloyd's marketplace where it will undoubtedly yield valuable gains.

Hamilton at Lloyd's is the brand name for Hamilton Underwriting Limited, the Lloyd's managing agency acquired by Hamilton Insurance Group in April 2015, and for Syndicate 3334. Syndicate 3334 is a diversified multi-line insurance and reinsurance syndicate.

All syndicates benefit from Lloyd's ratings: A (Excellent) by A.M. Best, AA- (Very Strong) by Fitch Ratings and A+ (Strong) by Standard & Poor's and are backed by Lloyd's Chain of Security.

Hamilton Insurance Group, the parent company of Hamilton at Lloyd's, has more than \$1.5 billion in consolidated shareholders' equity as of December 31, 2015. Significant investors include Capital Z Partners, Performance Equity Management, Blackstone Strategic Opportunity Fund and principals of Two Sigma Investments.

Our investment portfolio is managed by Two Sigma Investments, a leading technology company applying the scientific method to investment management. Two Sigma combines massive amounts of data, world-class computing power and financial expertise to develop sophisticated trading models. Technology is used to constantly refine the investment process and to gain insights into how the markets will behave.

We are rated "A-" (Excellent) with a stable outlook by A.M. Best Company, Inc. and have a Financial Size Category of Class XIII. We maintain a conservative risk profile, limiting Probable Maximum Loss (PML) to 15% of shareholders' equity in the US and 10% for the rest of the world.
